NomadicArk.com

A woman with blonde hair, wearing a grey sweater and brown leggings, sits cross-legged on a white bed in a motorhome. She is looking up at a large, rectangular skylight on the ceiling. The skylight is surrounded by a white frame with integrated LED lighting. The interior of the motorhome features light-colored wood paneling and a modern design.

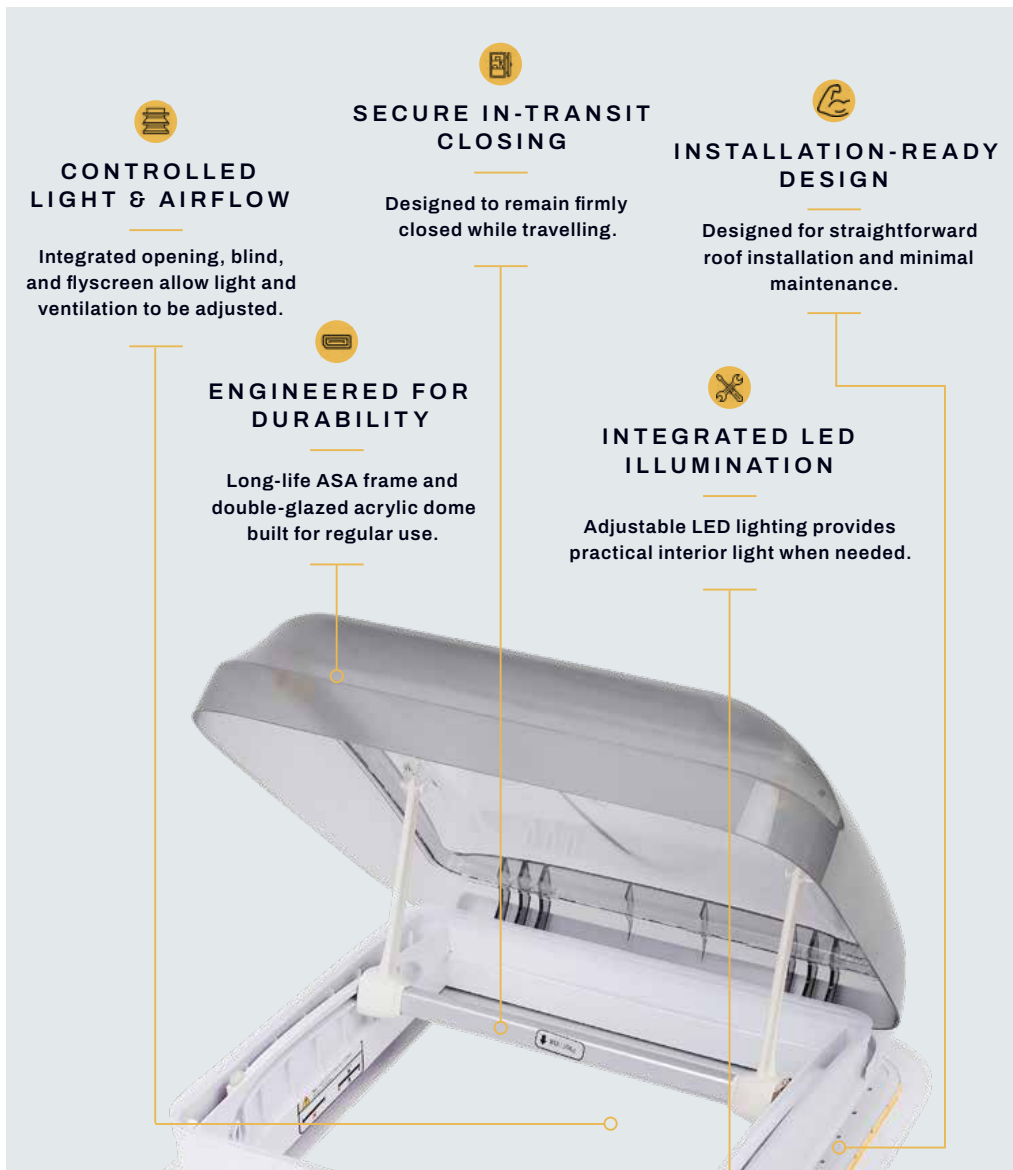

CONTROLLED AIRFLOW

DESIGNED FOR LIFE ON THE ROAD.

The NomadicArk Skylight is a premium roof-mounted solution engineered for professional motorhome and RV conversions.

Designed to enhance interior comfort, this skylight combines smooth gas-strut operation with integrated ventilation and adjustable LED lighting. The double-glazed acrylic dome provides excellent thermal insulation while remaining UV resistant, helping regulate interior temperatures throughout the year.

Built using long-life ASA frame material and certified to E-mark and DOT standards, our skylight range delivers dependable performance in demanding environments — without compromising on ease of use or finish quality.

GAS ASSISTED OPENING

The skylight opens smoothly using integrated gas struts, allowing controlled, effortless operation. This design ensures stable positioning at any angle while reducing strain during opening and closing, even in overhead installations.

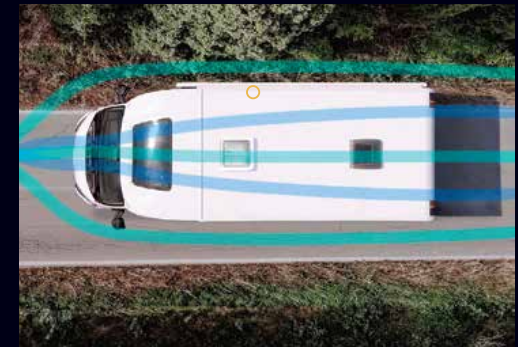

QUIET BY DESIGN

With no motors or powered mechanisms, the skylight operates silently. Ventilation and opening adjustments can be made without disruptive noise, supporting a calm and comfortable interior environment — ideal for night-time use and sleeping areas.

THERMAL PERFORMANCE

The double-glazed acrylic dome delivers effective insulation while remaining lightweight and durable. This construction helps regulate interior temperatures by reducing heat loss in colder conditions and limiting excessive heat gain in direct sunlight.

COMFORT & PROTECTION

Designed to enhance interior comfort, the skylight integrates controlled ventilation with practical protection features.

Adjustable airflow helps manage condensation and air quality, while the pleated blackout blind and flyscreen provide light control and insect protection as standard.

SIZES

280x280 HATCH

SLT1-280280

Compact and lightweight. Ideal for toilets or tight spaces where ventilation is needed without sacrificing headroom.

280x280 HATCH

SLT1-280280T (TURBO)

Enhanced ventilation with active airflow. Ideal for bathrooms or cooking areas where air extraction is needed.

400x400 HATCH

SLT2-400400FV

A versatile mid-size option. Perfect for living areas, offering a balance of airflow, light, and easy installation.

450x400 HATCH

SLT3-450400FLV

Designed for utility spaces. Provides increased ventilation where moisture or heat build-up is more likely.

500x700 HATCH

SLT3-700500FLV

Maximum light and airflow. Best suited to main living areas, creating an open, spacious feel inside the vehicle.

CUSTOM

IN COMPLETE CONTROL

Each fridge is equipped with built-in Bluetooth connectivity and our exclusive NomadicArk App – a standout feature your customers will really appreciate. Whether they're relaxing inside their campervan or sitting outside enjoying the view, they can monitor and control fridge settings directly from their phone.

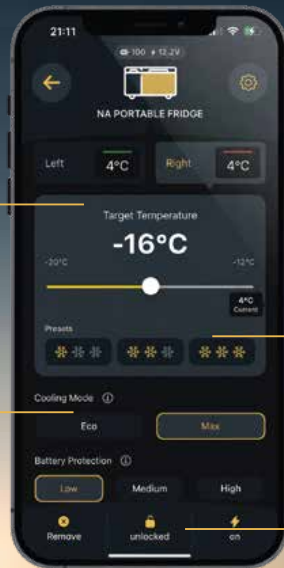

While app control is becoming more common, the NomadicArk system sets itself apart with an intuitive interface and intelligent features that make it easier for your customers to manage their cooling on the go – giving you a unique selling point in a competitive market.

TEMPERATURE CONTROL

Adjust fridge and freezer set-points. Keep track of the fridge temperature while you travel..

POWER MANAGEMENT

Check the source, levels and protection.

MODE SELECTION

Presets to allow for quick and easy one-press setup.

EASY USE

Turn the fridge on/off and prevent any unwanted changes with a one-tap lock.

FEATURES NOT AVAILABLE ELSEWHERE

MULTI-UNIT CONTROL

Manage all your NomadicArk appliances from one app. Monitor temperatures, adjust settings, and receive alerts for each unit - all in one place.

APPLIANCE GROUPING

Organise your appliances by vehicle or setup for effortless management. Create custom groups - whether for individual vans, demo units, or customer builds - and view or adjust all linked appliances at once. Ideal for fleet managers, converters, or sellers with multiple vehicles, you can easily switch between units, reassign fridges to new vehicles, or remove them when sold. This makes managing inventory, after-sales support, and customer demonstrations simple and efficient.

HINTS & TIPS

The app supports you with built-in advice for optimal performance. Receive timely reminders for routine care - like compressor maintenance - to help extend the unit's lifespan and maintain efficiency. These proactive tips not only keep the fridge running smoothly but also reduce the need for after-sales support or troubleshooting.

COMPRESSOR MAINTENANCE

A few minutes of care helps keep performance high.

Clean air vents and grills - Remove dust, lint, or debris from the air vents and ventilation area using a soft brush or vacuum.

Check for obstructions - Make sure nothing is blocking the air vents around the fridge.

Check power connections - Ensure all power connections are secure.

A NEW STANDARD

At NomadicArk we believe in creating experiences that are shaped by the way we live. This is in everything we do.

We've built a wealth of knowledge that we pour into each product to provide the features, quality, compelling experience and value the market demands. Our customer-oriented approach means we pay attention to the smallest details to provide attractive and useful products to the trade conversion market.

The strong B2B partnerships we form incite and inspire our future plans, and we're proud of how this focus fosters customer loyalty and repeat business.

PRODUCT QUALITY

To maintain the NomadicArk brand's reputation for quality, we only source from trusted and professional manufacturers.

RELIABLE SERVICE

Leveraging the needs of a large customer base, we're able to secure exceptional service from our suppliers.

SUPPLIER RELATIONSHIPS

Our team proactively visits suppliers' facilities to assess their control procedures and foster collaboration.

INNOVATIVE SOLUTIONS

Our global reach across diverse markets allows us to combine insights and inspire innovative solutions.

SAFETY STOCKS

We can hold large safety stocks to provide peace of mind and mitigate potential supply chain disruptions.

STRONG ARCHITECTURE

We've made significant investment into our proprietary supply control management systems.
